

*CLAIM AMENDMENTS*

1. (Currently Amended) A lens forming method including:  
placing an optical material having a spherical shape and an outside diameter between an upper mold and a lower mold, ~~outer outside~~ diameters of ~~said the~~ upper mold and ~~said the~~ lower mold being constrained by an inner diameter of a trunk mold, the ~~outer~~ outside diameter of ~~said the~~ optical material being 95% to 100% of the outside diameter of ~~said the~~ upper mold and ~~said the~~ lower mold; and  
compressing ~~said the~~ optical material having a spherical shape between ~~said the~~ upper and lower molds, thus forming a non-spherical lens.
2. (Currently Amended) The lens forming method according to claim 1, wherein the outside diameter of ~~said the~~ optical material and the outside diameter of ~~said the~~ upper mold and ~~said the~~ lower mold are the same.

Claims 3 and 4 (Cancelled).
